Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1,2, 4-8 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for C-6 ceramide as the hydrophobic therapeutic agent, does not reasonably provide enablement for all hydrophobic therapeutics. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

Applicant provides a laundry list of hydrophobic therapeutics in the specification which "ay" be compatible with the formulation. However, enablement has not been shown for this. Applicant also directs all the examples to C-6 ceramide. Given the unpredictability of coating stability as taught by applicant and the prior art, on c-6 ceramide has been enabled. Clarification is requested.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2, 4-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Crandall (US Patent No. 5,945,409).

Crandall claims a formulation containing lecithin (oil), and another solvent which may be an alcohol, particularly ethanol (see claims 2 and 3). Ceramide may be incorporated as shown at claim 9. Salicylic acid (anti-inflammatory) may also be incorporated. Vitamin E is additionally added in claim 15. Intended use does not give weight to composition claims. The instant formulation is anticipated by Crandall.
